

## Converso® App

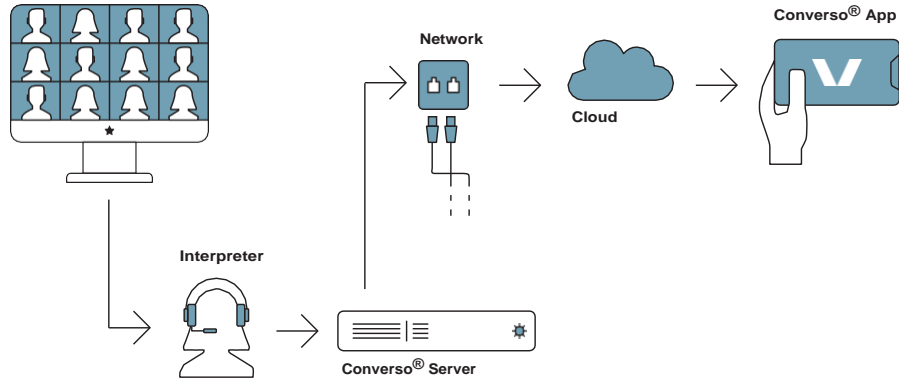

Simultaneous interpreting and audio streaming on smartphones, on cloud and offline. It works with any kind of connection, Wi-Fi or 3G/4G, or with local Wi-Fi.

**Free download available on App Store and Google Play**

### Remote event

In parallel with any third party video conferencing platform, webinar platform or streaming

#### Videoconference

## It can be customized and integrated with your event app *event app*

The app is open and easy to use. It can be customized with your logo and your corporate colours. Both cloud and local broadcasting available, with or without internet connection, or hybrid. You can listen to simultaneous translation both on your browser or on your phone via phone call.

## From BYOD to the most flexible digital bidule

You can use our app for on-site events or in parallel with a third-party video conferencing or webinar platform. It is very easy to use: you enter the token, you choose your language among the languages available and you set the volume. Thanks to its versatility, it is simple and cost-effective.

### On-site event

as BYOD (Bring Your Own Device), replacing traditional receivers
